Star Trek prerelease cheat sheet (DEC-1218)

Sealed grades, 0 to 10, from oracle text. I checked them against MTG Arena Zone's Draft review on 2 November (49 cards re-read, 20 changed), against Draftsim's pick order on 3 November (18 re-read, 11 changed), against Draftsim's set review on 3 November (62 re-read, 34 changed), and against Limited Resources' commons and uncommons on 4 November (27 re-read, 11 changed). On 5 November I checked every note and rule against the card text (23 notes fixed, 1 grade changed). Our uncommons sit 0.62 grade above our commons, under the 1.0 target (Draftsim's review: 1.22; Limited Resources: 1.18; MTG Arena Zone: 0.51): between two cards half a grade apart, prefer the uncommon. ★ bomb · ⚔ removal · ⚡ trick · ◆ fixing · ✚ card advantage · ⚪🔵⚫🔴🟢 colour · 🟡 gold · ◇ colourless.

1. Scoring your pool by hand (10 minutes)

1. **Sort by colour.** A hybrid card counts for either colour, once per pair; put gold cards aside.
2. **Count per colour:** cards graded 6+, cards graded 4+, and bombs (★). Write them on the deck box.
3. **Pick the two colours with the most 6+ cards.** A ★ counts as two 6+ cards. Add the pair's gold cards.
4. **Check: 22-23 cards graded 4+ and 15+ creatures.** Count the pair's two colours, its gold cards and your colourless non-land cards. Spacecraft are not creatures. If short, look at the next colour or a splash.
5. **Splash up to 3 cards graded 6+ with 3+ sources of their colour, at most 1 of them a basic.** Sources: duals and shock lands that make it, Class-F Shuttlecraft, Xenobotanist, David and Carol Marcus, Creators, Stable Wormhole. With 4+ non-basic sources, the third colour may also fill step 4, with cards of 3+ mana.
6. **Build 17 lands and 23 spells, with 7-8 two-drops.** Play the ⚔ you have, but do not pick colours for it.
7. **Tie between pairs?** Pick more ★, then more ✚, then more ⚔, then more two-drops.

2. Format rules that decide games

- **Station: tap another creature, at sorcery speed, to put charge counters equal to its power on a Spacecraft.** At the stripe that shows power and toughness, it becomes an artifact creature. 17 Spacecraft, 3 of them common.
- **A creature tapped to station stays tapped through your opponent's turn and cannot block.** It may have entered this turn. Attack with vigilance creatures first, then station in your second main phase.
- **A Spacecraft below its number is not a creature.** Creature removal cannot hit it, and it cannot block. These hit it: 70,000 Light-Years from Home, Guidance Failure, Malfunctioning Holodeck, Marooned, and artifact removal.
- **Face a dilemma = choose a mode.** Each modal spell or ability ("choose one —") counts once as you choose, even if it is countered later; with no legal mode it does not count. 39 cards have modes (14 commons); 9 cards pay off.
- **Beam me up: cast the sorcery again from your graveyard and return one of your creatures to your hand as part of the cost.** The spell is then exiled. 10 sorceries have it (5 commons); Scotty, Miracle Worker gives it to your graveyard. Return a creature with an enters ability to use it again.
- **Strange new worlds counts the different land names you control.** Each basic type counts once, each Planet dual once, all New Planet tokens once. A two-colour deck with one dual counts 3. 13 cards.
- **Federation counts the creature types among your non-Borg creatures.** Officer tokens add Officer. 6 cards, none common; Saavik's damage uses it.
- **A stun counter keeps a creature tapped through its next untap.** 6 cards; Constable Odo puts two.
- **Planet duals enter tapped and gain you 1 life.** A pool holds about 3 (one in two packs, land slot only).
- **3 damage kills 75% of creatures; 4 damage kills 88%.** In combat, respect open {W}, {1}{B} and {2}{R}: Set Phasers to . . ., Eject the Warp Core, Plasma Cascade.

3. Removal by color

⚫ Black has the most removal (7 cards) and 🔴 red the highest mean grade (6.8). At common and uncommon, ⚪ white has the most (6). 🔵 Blue has 3 and 🟢 green 2.

Colour	Common	Uncommon	Rare/Mythic	Total	Mean grade
W	3	3	0	6	6.4
U	2	1	0	3	5.0
B	2	3	2	7	6.6
R	3	2	1	6	6.8
G	1	1	0	2	6.0

What removal kills. Toughness of the set's 165 creatures:

Toughness	1	2	3	4	5	6+
Share	20%	26%	29%	13%	5%	6%
Cumulative	20%	46%	75%	88%	94%	100%

Share with toughness 3 or less, by colour: ⚪ W 86%, 🔵 U 69%, ⚫ B 70%, 🔴 R 80%, 🟢 G 71%.
